BERETTA T44

Specifications	Typical uses
<ul style="list-style-type: none">•Max Torque: 8.03 nm•Max Rotation Speed: 352 rpm•Travelling Height: 2510mm•Operational Height: 7500mm•Travelling Length: 5140mm•Operational Length: 3270mm•Width: 1000-1400mm•Gross Weight: 4400kg•Max Drilling Diameter: 200mm	<ul style="list-style-type: none">•Geothermal Boreholes•Rotary open Holes•Water wells•Auguring•DTH•Simultaneous Casing Installations.

Features & Benefits:

- With its reducible tracks the Beretta T44 is able to move over soft ground and width restricted areas with minimal damage.
- Versatile mast dump arrangement allows the drilling of angle holes.
- This versatile and compact machine has a wide range of uses and can move in difficult access areas.
